

## 9002 Series Mobile Systems

### Providing Solutions for Mobile Monitoring

Our Mobile shelters are fully customized to fit the customer needs. We understand that whether it is an ambient system, mobile laboratory or stack testing trailer the layout and design will be different. We work closely with the client to understand their preferences during the design period. CAS then utilizes premium products and materials when manufacturing your mobile system. Adhering to the strictest manufacturing practices we can guarantee that we will exceed your expectations.

*Each system is designed specifically to suit the intended application and to provide the end user with the flexibility of a mobile system.*

#### Why CAS?

**KNOWLEDGE:** Consolidated Analytical Systems (CAS) provides expertise in the design, manufacturing, integration and support of Monitoring Systems for ambient air, industrial fence line and natural gas pipeline sectors. The CAS-manufactured process and standalone Laboratories, Shelters and Enclosures are designed with LEED energy efficiency principles and instrument optimization in mind. CAS offers a complete line of industrial and field deployable gas chromatographs for VOCs and speciated sulfurs as well as Natural Gas impurity measurement, mercaptan identification and odorization.

**EXPERTISE:** CAS has a proven track record providing the best monitoring systems to monitoring experts such as the United States Environmental Protection Agency (USEPA), private industry and State and local agencies.

**PARTNER:** CAS routinely partners with Industry to provide no-hassle monitoring systems and shelters. CAS designs and manufactures a complete range of Shelters and Mobile Systems, for a wide variety of applications including ambient air monitoring, fence line monitoring, stack testing and CEMS.

# Experts in Ambient Air Quality Monitoring Systems and Integration

## Features

CAS 9001 Series Mobile Systems offer various solutions to fit any need.

- Multiple Platforms
- Pull Behind Trailers
- Multiple sizes available
- 5<sup>th</sup> wheel or standard
- Custom Vehicle Designs
- Box Trucks
- Sprinter Style Vans
- Standard Vans
- Shore Power
- Transformers
- Solar

## Premium Components

CAS 9001 Series Mobile Systems feature all premium components.

- Rubber Torsion Axles
- Square D electrical components
- Commercial Wall-mount HVAC units
- Auto-switching digital thermostats
- Speed Rail for roof access
- All metal surface mount electrical raceway
- Heavy duty scissor jack stabilizers
- Aluminum Exterior, screw-less
- Seamless vinyl flooring
- All aluminum interior trim
